

FACT SHEET

KVS-101 School Bus Stop Sign

KVS-101 is for protecting students' safety during bus taking on and off. The School Bus Stop Sign has four LED lights and will flash when sign is rotating out. This reduces accident risk and keeps traffic clear.

KVS-101 can be manually pulled out. When the vehicle speed more than 5 km/h, the stop sign will be retracted automatically.

KVS-101 is qualified for international standards, such as SAE, EMC, E-mark, FCC and CNAS.

***Recommend:** Mounted with School Bus Stop Bar will be more efficient for safety.

FEATURES AND BENEFITS

1. Students' safety protection
2. Traffic environment more friendly

SPECIFICATION

- | | |
|------------------------------|---------------------------------|
| 1. Dimension----- | 40mm × 89mm × 100mm |
| 2. Sign diameter----- | 450mm, 500mm |
| 3. Weight----- | <6KG |
| 4. Operating voltage----- | 12VDC ; 24VDC |
| 5. Waterproof leve----- | IP65 |
| 6. Anti-reflection film----- | Grade II film as per GB/T 18833 |
| 7. Rotation angle----- | 90°±5° |

HOMOLOGATION REPORT

- | | |
|------------------------------------|------------------------|
| 1. American National Standard----- | SAE, FMVSS131 |
| 2. Test Standard----- | EMC, E-mark, FCC, CNAS |
| 3. Invention patent number----- | ZL 2012 1 0190571.7 |
