

FACT SHEET

KVS700R (GJ) DVR Controller

KVS700R is a 7-inch touch monitor helps driver communicate with KVS8713HEB APTMS OBU and the control center. KVS700R is developed on platform of Android OS, shows the info such as parameters configurations, route selection, receive and send message, play video, etc.

SPECIFICATION

Item	Specification
OS	Android
Language	Chinese, English, French
CPU	800MHz, ARM Cortex-A8
Monitor	7.0' capacitive touch screen, TFT LCD
Resolution	800*480
Keypads	6
COM Port	3*RS232 for OBU, navigation and standby function
Card Reader	13.56Mhz, ISO/IEC 14443A/MIFARE card reader
Micro USB	1*Micro USB for debugging and upgrading
TF Card Slot	8G TF card embedded
Embedded Speaker	Impedance: 8Ω; Power consumption: 2W
Storage Temperature	-30~80°C
Working Temperature	-20~70°C
Humidity	10%~95%, no condensation
Power Supply	DC 5V

FEATURES AND BENEFITS

1. Query the working status of MDVR, such as GPS signal, network status.
2. Adopts RFID technology, self-check-in and record attendance for drivers
3. Information for station info, text messaging and communicating to control center.
4. Over-speed alert
5. Driving record will be stored and upload.
